16<sup>th</sup> December 2025

Dear Kirsty Harte,

**Ref: Planning Application Ref 24/00384/FUL – Installation and Operation of a Solar Farm and Battery Energy Storage System, Land Adjacent to A614, Worksop.**

Further to your letter requesting comment on the amendments made to this application, please find here our comments which remain unchanged from the previous request for comment on the 17th April 2024.

GAL requested prior to the submission of this planning application that the developer undertake a glint and glare report to consider the potential effects caused by the proposed PV development on aviation operations from Gamston Airport. This report was received on the 25th of March.

The developers report demonstrates a minimal effect upon a limited part of Gamston Airport.

The development is not assessed as having a negative or safety impact upon the operation of Gamston Airport, or the functioning of Track Testing Operations.

In conclusion, GAL has no objection to the planning application, subject to the developer undertaking the development as detailed in the application.

Yours Faithfully,

A handwritten signature in black ink, appearing to read "E McLeod".
