| | |
|-----------------|---------------|
| District | Parish |
| Bassetlaw | West Drayton |

Small stone bridge which has 2 pointed arches with chamfered arch rings, the only bridge of this type in the county. Its total span is only 9yds, but the width is about 18ft, the bridge having been widened by means of concrete girders. (1)

Probably an Elizabethan bridge, c 1600 AD. Stone cutwater N and S, concrete pillars and scaffold rails do little to enhance bridge, which can only be realized when one is below the main structure. (2)

Reference to bridge in 1216. (4)

NB Listed as "Eel Pie Bridge".
